

## Adhesive for fleece-backed synthetic TPO waterproofing membrane system

### Uses

Provides an adhesive for the fully bonded waterproof membrane system Fosroc Proofex OFB

- Podiums, parking decks, flat roofs, sloping roofs.
- Garden areas

### Advantages

- Adhesion to most common building materials
- Solvent free
- Fast application

### Description

Solvent free moisture curing polyurethane based adhesive designed for bonding the Fosroc Proofex OFB membrane to various substrates.

### Properties

Solid content	100%
---------------	------

Flash Point	>200°C
-------------	--------

Density	1.15
---------	------

### Application Instructions

Surfaces should be free from cavities and projecting nibs. All surfaces shall be free from frost, surface laitence and contamination.

### Adhesive

Apply Fosroc Proofex OFB adhesive by scraper or roller at coverage rate to suit substrate, typically approximately 0.2kg/m<sup>2</sup>. Leave for 5 to 10 minutes

### Membrane

Lightly moisten the Fosroc Proofex OFB membrane on the fleece side to improve the initial bond strength, then roll the membrane into the adhesive before skin formation, and press firmly, press again after 30 minutes if required.

The membrane layers are overlapped at the selvedge to achieve a minimum weld of 50mm. Hot air welding can be either hand applied or by means of automatic machines.

Full cure will take between 1 and 5 hours depending on air humidity and temperature.

### Packaging

Proofex OFB adhesive	20kg pail
----------------------	-----------

### Storage

Fosroc Proofex OFB adhesive has a shelf life of 9 months if stored in a cool, dry store, away from sources of heat, in the original unopened packing.

### Precautions

#### Health and Safety

Avoid contact with skin, immediately wash with water and soap and rinse thoroughly. In case of contact with eyes, rinse immediately with plenty of water.

For further information, please consult the Material Safety Data sheet.
